Mohamed Khalil

React Front-End Developer

+201211507060 | mohamedkhalel852@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

React Front-End Developer with hands-on experience building responsive, scalable web applications. Proficient in modern JavaScript (ES6+), TypeScript, component-based architecture, REST API integration, and state management. Experience building bilingual Arabic/English (RTL/LTR) interfaces. Complementary background in UI/UX principles and Figma, enabling seamless translation of designs into polished, user-friendly interfaces.

TECHNICAL SKILLS

Languages	HTML5, CSS3, JavaScript (ES6+), TypeScript
Frameworks	React, Bootstrap, Tailwind CSS
State & Data	Context API, Formik, Yup
Routing & APIs	React Router, REST APIs, Axios, Async/Await
UI Libraries	SwiperJS
Design	Figma, UI/UX Principles, Responsive Design
Tools	Git, GitHub, VS Code
Concepts	Clean Code, Component Architecture, Performance Optimization, API Integration

WORK EXPERIENCE

Front-End Development Intern | CASCOTEC *Jan 2026 – Present*

- Built and maintained features on iCasco, a React/Vite/TypeScript certification management platform with Arabic/English (RTL/LTR) support.
- Implemented form validation logic using custom hooks (useFieldValidation) and a centralized validators.ts module.
- Built full pages from scratch including DashboardTasksPage and DashboardActivities, and audited 22 API endpoints across the platform.
- Worked on Figma mobile UI and translated designs into reusable React components, including an AccordionSection for multi-section forms.
- Contributed to the Audit Clients registration flow and handled bilingual layout switching across the app.

Front-End React Track Trainee | Digital Egypt Pioneers Initiative (DEPI) *Oct 2025 – Jun 2026*

- Built real-world web applications using React and modern JavaScript (ES6+).
- Integrated REST APIs and handled asynchronous data fetching efficiently.
- Managed application state using Context API across complex component trees.
- Implemented dynamic features including authentication (JWT), cart management, and protected routes.
- Applied clean code practices, debugging techniques, and performance optimization.

PROJECTS

E-Commerce Web Application GitHub: Link Live Demo: Link

- Built a React e-commerce app on a public REST practice API: product search and details, cart with live item count, checkout, and order history.
- Implemented JWT authentication, protected routes, and form validation with Formik + Yup.
- Added loading and error states with retry on every API screen, and route-level code splitting.
- Delivered a fully responsive UI with app-wide cart and login state shared through Context API.

Weather Forecast App GitHub: Link Live Demo: Link

- Built a responsive weather app with a 3-day forecast from WeatherAPI, a °C/°F toggle, and the last searched city remembered.
- Implemented city search with live auto-suggestions as a keyboard-accessible combobox.
- Added a "Use my location" button with a graceful fallback when permission is denied, plus loading and error states.

Personal Portfolio Website GitHub: Link Live Demo: Link

- Built a bilingual (English/Arabic, RTL) portfolio with React 19, TypeScript (strict mode), Vite, and Tailwind CSS v4.
- Prerendered every page with its own SEO metadata and sitemap, and added light/dark themes.
- Wrote automated tests with Vitest, including checks that English and Arabic content stay in sync.

EDUCATION

Bachelor's Degree in Communications & Computer Engineering

Higher Institute of Engineering and Technology – Tanta *Expected Graduation: 2028*

LANGUAGES

Arabic — Native **English** — Professional Working Proficiency
